Attachment C: Prolonged Physical Restraint or Stress

Project Title: __________________________________________________________
____________________________________________________________________
____________________________________________________________________
____________________________________________________________________

1. Explain rationale for using restraint or induction of stress:

2. Give a brief description of the device that will be used to restrain the animal, including dimensions or other specific features:

3. Confinement to the device:
   Duration each time: __________________________________________________
   Frequency of confinement: ____________________________________________

4. What are the observation intervals during confinement?

5. Who will be making the observations?

6. Will pain or discomfort be induced?
   _____ YES (Please describe below)    _____ NO

Attachment C: Page 1 of 2
7. Will electrical or other forms of stimulation, including light and/or sound, be used to modify behavior?

______ YES *(Please describe below)*    ______ NO

8. Will food be withheld for 24 hours or water for 12 hours, or will diet be deficient in one or more nutrients?

______ YES *(Please describe below, then complete Questions 8a-8b)*    ______ NO *(Skip to Question 9)*

8a. How long will the diet be used?

8b. How often will the animal be weighed?

9. How will you determine the general well being of the animal?

10. Will analgesics, sedatives or tranquilizers be used for additional restraint?

______ YES *(Please explain)*    ______ NO
